

**October 2016****1st Hellenic – Israeli Industry Day**

The General Directorate for Defense Investments and Armaments (GDDIA) organized on October 31<sup>st</sup> 2016, the "1<sup>st</sup> Hellenic–Israeli Industry Day" at the Hellenic Armed Forces Officer's Club in Athens, within the frameworks of extroversion of Greece Defense Industry.

Representatives of defense industries of Israeli and Greek presented their companies, products and activities in 5minutes presentations. At the end of the presentations, B2B meetings took place in order for possible collaboration between the companies to be explored.

Dr Nora Gourdoupi (R&D manager of Advent Technologies) presented Advent activities, focusing on a 100W portable system for military applications based on HPEM fuel cells. It uses methanol as a fuel and can run continuously off the grid for up to two weeks with a single hot swappable fuel tank.

The Deputy Minister of National Defense of Greece announces the opening of the conference
